

TECHNICAL TRAINING

...the best source for plastics companies

MAPP is the industry leader in providing effective & affordable training that positively impacts employees so they positively impact your bottom line!

Live Web-Based Training:

MAPP utilizes state-of-the-art Technology to provide LIVE training delivered to your employees via the use of advanced internet technology. Delivered by leading experts in their field, MAPP's courses utilize the best instructors in the business.

Easy to Use & Highly Effective:

MAPP schedules training at more convenient times so that all employees have the same opportunity to train. No travel and little shift coverage is required.

Best Value for the Dollar:

No travel, no overnight stays, and multiple employees may take part in all training sessions. MAPP's training has proven to motivate employees to both learn and contribute to their company's success!

What industry executives are saying...

"MAPP's training courses are by far, the best technical training offered in the industry."

--Tom Duffey, President, Plastic Components, Inc.

"Our employees have participated in every MAPP course...the instructors are great, and we don't have to send people out of the plant!"

--Sam Holden, COO, Richardson Molding

"We've reaped great benefits from this live web training. Over 51 of our people have taken MAPP classes... saving us thousands of dollars comparatively."

--Jodi Van Guilder, 21st Century Plastics Corporation.

Fees:

Companies can send up to 3 employees to each of training session. Fee includes one training link per location and is purchased at a Flat Rate based on total employment.

Employees in Company	Number of Training Classes				Total Cost
