

## **Wepeco Plastics Protective Face Shield to Assist in Minimizing the Detrimental Effects of Current COVID19 Crisis**

Middlefield, Connecticut - Wepeco Plastics is excited to announce the launch of our quality, affordable face shields, a fully functional and rapidly assembled product that will assist in meeting the dire need for personal protective equipment used to combat the spread of COVID19. Shields are out the door for an extremely low price of \$3 per individual product, and as low as \$1.48 for products ordered in high quantities. The official launch date for Wepeco's Protective Face Shield was Monday, April 6th, 2020, and is currently running for as long as the need is present.

Wepeco believes this Protective Face Shield will assist in the essential safety of front-line heroes from ICU staff, to first responders, to caretakers and so on. Wepeco cares not only about this essential protection against this health crisis, but also about the current dire financial situation that many individuals and companies are facing at this time, therefore shields are offered at extremely low costs and by the hands of hard-working team members who have dedicated the entirety of their shift strictly to the production of this product. In addition to this, Wepeco Plastics is creating our own supply chain through colleagues who are assisting us in assembly work. The launch of Wepeco's Protective Face Shield occurred swiftly in order to get these shields at the doorstep of customers as quickly as possible. Any inquiries can be made to [amanda@wepecoplastics.com](mailto:amanda@wepecoplastics.com).

  - Staples
  - Glue
  - Soft Foam 1"
  - Blue Tape 9"

## Reviews and Quotes

“I wanted to thank you and all the folks at Wepco for the tremendous work you are doing on behalf of the healthcare workers in our state. I received your prototype face mask and I’m most impressed with what you’ve developed. It’s light, functional, and very comfortable. You took a functional design and made it better and less expensive to produce. I understand you’ll ship approximately 4,500 units this week with volumes increasing significantly over the next few weeks and that your initial shipments will be going to Yale and the State purchasing team. It’s great to see that Yankee ingenuity and determination are alive and well in our manufacturing community.”

— Colin Cooper, Connecticut Chief Manufacturing Officer

“Thank you, thank you, thank you to Wepco Plastics Inc. for what you are doing to help people working on the frontline here in CT! Thank you for making comfortable face shields for my husband and other fellow Correctional Officers. They were operating with little to no PPE. Most were given a simple cloth shield just days ago, which are difficult to disinfect and wash when you are working back-to-back 16 hour shifts... having face shields readily available just adds an extra layer of comfort in knowing you are better protected.”

— Jenn Wales & Family
